PREFACE TO VOLUME VII.

THIS volume contains the words beginning with the letters O and P. Including the Main words, to which separate articles are allotted, the special Combinations or compounds, explained and illustrated under the Main words, and the Subordinate entries of obsolete and variant forms entered in their alphabetical places, with a reference to the Main words under which they are treated and illustrated, the number of words amounts to 41,667. The Combinations of simple and obvious meaning, of which lists are given under the Main words, without separate explanation, but in most cases with illustrative quotations, number 7,203, raising the actual total of words and compounds recorded in the volume to 48,870.

These words are thus distributed among the letters:

	Main words	Subordinate words.	Special Combinations.	Obvious Combinations	Total No of Words	No of Quotations.
O (356 pages)	7,118	1,198	692	2,173	11,181	38,675
P-Pf (404 „)	7,208	1,811	1,281	1,470	11,770	41,880
Ph-Py (696 „)	15,974	3,384	3,001	3,560	25,919	94,575
Total	30,300	6,393	4,974	7,203	48,870	175,130

Considered as to their status in the language, the Main words are distinguished approximately into those which are native or fully naturalized, and still *current*, those now *obsolete* (marked †), and those considered to be *alien* or imperfectly naturalized (marked ||), although in the case of both the latter it is often difficult to draw the line. The distribution of the 30,300 Main words is approximately as follows:

	Current.	Obsolete	Alien	Total
O	5,347	1,506	265	7,118
P-Pf	5,471	1,201	536	7,208
Ph-Py	12,302	2,628	1,044	15,974
Total ¹	23,120	5,335	1,845	30,300

Etymologically considered, the O section and the P section of the English vocabulary differ greatly in the proportions of their elements. O is in this respect an ordinary letter, containing a good proportion of words of Anglo-Saxon derivation, beside those of later adoption, from Scandinavian, Old French, Latin, and Greek, and more distant languages. Among the words that go back to Old English use are the prepositions *of* (to the lexicographer the longest and most difficult of English prepositions, the treatment of which in this Dictionary occupies 18 columns), *off*, *on*, *over*, the adverbs *off*, *oft*, *often*, *out*, the conjunction *or*, the numeral and pronoun *one* with its derivatives *once*, *only*, etc., the pronominal words *other*, *our*, *own*, the verbs *ought*, *owe*, *own*: all of great interest to the student of the historical grammar of the language. There are also numerous well-known substantives, as *oak*, *oakum*, *oar*, *oat*, *oath*, *oose*, *ordeal*, *oven*, *owl*, and important adjectives as *old* and *open*. To these must be added the words compounded with *out* (1,250, including 775 Main words), and *over* (2,173, including 1,413 Main words). The *out*- and *over*-compounds occupy more than a fourth of O. The words from Latin include the compounds in *ob*- and its phonetic variants, *oc*-, *of*-, *op*-, and important words such as *order* and its family. Among the words from Greek are the numerous compounds in *ortho*-, and the chemical terms related to *oxygen*.

In P, on the other hand, the words that go back to Old English are a very small company. Of the 23,000 Main words here dealt with, about 80 appear in the Anglo-Saxon Dictionary, of which, however,

¹ Adding these to the words in Volumes I-VI, we have for the portion of the alphabet from A to P the following figures:

Main words	Current.	Obsolete.	Alien	Subordinate words.	Special Combinations	Obvious Combinations.	Total
160,519	146,134	11,197	3,188	40,440	30,139	33,819	264,917

For the letters O and P, the comparative scale of this work and of certain other Dictionaries is shown by the following figures:

	Johnson	Cassell's Encyclopædic.	'Century' Dict.	'Funk's Standard'	Here
Words recorded	4,485	19,873	25,585	27,097	48,870
Words illustrated by quotations	3,661	6,337	8,368	2,379	38,365
Number of illustrative quotations	12,111	9,642	20,340	3,243	175,130

The quotations in Richardson's Dictionary in O and P are 9,640.

NEW ENGLISH DICTIONARY.

50 were borrowings from Latin, leaving only about 30 really 'native', most of them found in other Germanic languages. Among the chief of these are *pan*, *path*, *penny*, *pith*, *play*, *plight*, *plough*, *pock*, *pool*, *pretty*, *prick*, *puff*, *pull*, *put*. Of these the two last scarcely appear in Old English, but have since become verbs of great importance; the article PUT is, after GO, the longest as yet in the Dictionary, and has proved one of the most difficult. From causes stated in the article on the letter P, this was the rarest initial consonant in Old English, occupying in Bosworth-Toller's Anglo-Saxon Dictionary only one-fifth of the space of O. But its constant accessions from other languages, and apparently its aptitude to form onomatopœic words, have made it in the modern dictionary next in compass to S and C, with which it forms a triad of gigantic letters, containing together considerably more than a fourth of all the words in the language. The accessions began with the 50 words from Latin already mentioned, some, like *pile*, *pit*, and *pound*, of West Germanic age, but most of them only pre-Conquest English, either ecclesiastical, as *pall*, *pope*, *priest*, *prime*, or names of foreign plants and animals, as *parsley*, *pear*, *pease*, *pepper*, *peacock*. The accessions continued with the words from Old French, in origin mostly Latin, and subsequently with words formed directly from Latin (sometimes ultimately from Greek), and also, from the 16th century, in the terminology of philosophy and science, from Greek directly. From the 16th century, words began to crowd in from other European and more distant tongues, until now there are to be found in the P division of this volume representatives of more than 50 languages. To these have been added a considerable number of words of unknown origin, many no doubt onomatopœias of English or its dialects. The compass of the letter has been greatly enlarged by the words formed with the Latin prefixes *per-*, *post-*, *pre-*, *pro-* (with its OF. form *pur-*), and with the Greek prefixes *para-*, *peri-*, *pro-*, and the formatives *pan-*, *panto-*, *philo-*, *poly-*, *pseudo-*, *pyro-*, etc. The words in PII are an alien group, representing (with few exceptions) Greek words in Φ, for which Roman spelling substituted PII, and which thus come in between PE- and PI-, at once to swell the P vocabulary and to increase its Greek elements. Of the 23,000 Main words in P, nearly 7,900—more than one-third of the whole,—are of Greek derivation, or are formed with a Greek prefix or first element. This is a proportion much larger than obtains in the language as a whole.

The material collected up to 1885 for O to OM- was arranged chronologically and in part sub-edited by Miss Margaret Haig, of Blairhill, Stirlingshire (now Mrs. Alexander Stuart). The section OO- to OPPROBRIUM was skilfully sub-edited by the late Rev. W. J. Lowenberg, of Starkies, Bury, 1887-96, who died in 1899, before seeing any part of O in type. The section OPPUGN to OW- was sub-edited 1895-6 by Mr. James Bartlett, of Cloverlea, Bramley, Guildford, who after more than 20 years' voluntary work at the Dictionary, during which he sub-edited also G, parts of M, R, and S, died on 15 August, 1908. The very technical section from OX to OZ- was arranged and sub-edited by Mr. H. A. Nesbitt, B.A. in 1895. For PA-, the material collected by the Philological Society had, in consequence of the death of the person who undertook its sub-editing, been nearly all lost or destroyed. It had in consequence to be collected anew, which was largely done by the late Mr. E. S. Jackson, M.A., Plymouth; as it accumulated, it was arranged, and finally sub-edited, 1882-7, by the late Miss J. E. A. Brown, of Cirencester. The slips for PE- to PELY- were sub-edited in 1884 by Mr. James Britton, F.L.S.; those for PEM- to PERP- by Mr. R. M'Lintock, of Liverpool, in 1885 and 1893-6; and those for PERS- to PIL- by Mr. W. J. Anderson, then of Markinch, who died in February, 1900. The large section PIM- to PROF- was laboriously sub-edited by Miss J. E. A. Brown, one of the most devoted and enthusiastic of our volunteer helpers, between 1900 and her sudden death on 19 February, 1907. Her work was ably continued, PROFIT to PRY, by the late Mr. C. B. Winchester, in 1907-8. The earlier material for PR- to PU- had been put in order by the late Mr. P. W. Jacob in 1885. The whole section PE- to PHV- was revised, with much new material, 1901-4, by our valued coadjutor the Rev. C. B. Mount, M.A., who also sub-edited, with much original research, the last section PS- to PYXIS in 1904-7. The generous and, in many cases, long-continued services of these voluntary collaborators, so few of whom, alas! survive, call for the fullest and most grateful recognition.

In the revision and improvement of the work in the proof stage, continuous and indefatigable help has been rendered by Misses E. P. and Edith Thompson, of Lansdown, Bath, whose investigations of the sense-history of difficult words, have been most fruitful and valuable; also by the Rev. Canon Fowler, D.C.L., Durham, the Rev. J. B. Johnston, B.D., Falkirk, Mr. A. Caland, of Wageningen, Holland, Monsieur F. J. Amours, Glasgow, and in later parts by Professor F. E. Bumby, Nottingham. Assistance with the proofs has been only a small part of the gratuitous services rendered to the Dictionary by Mr. R. J. Whitwell, B.Litt. Oxon., who has contributed to the history of legal, historical, and other words by special investigations in the Bodleian and Codrington Libraries, the British Museum, and the Public Record Office. Many of our earlier illustrations for such words are the fruit of his researches. Five of our zealous helpers in this department have been removed by death during the preparation of this volume: the Right Hon. Lord Aldenham, who had sub-edited parts of C and K for the Philological Society, and had read our proofs from the beginning, died in September, 1907, Dr. W. Sykes, F.S.A., who supplied

PREFACE TO VOLUME VII.

most of our quotations for recent medical terms, died in September, 1906; Mr. E. L. Brandreth, who had sub-edited portions of H, K, and N, besides reading our proofs, and verifying references in the British Museum Library, died in December, 1907; Mr. C. B. Winchester, who, as reader, sub-editor, and, after the death of Mr. Brandreth, collater of quotations in the British Museum, was the most valued of our later volunteer coadjutors, died in December, 1908; Mr. Chichester Hart, of Curraghblagh, Portsalon, Donegal, who added to the proofs many quotations from 16th and 17th century dramatists, died in 1908.

The scholars and men of science who have given their assistance in the present volume include nearly all those who have been named in the Prefaces to volumes V and VI, to whom again grateful thanks are recorded. More especially must mention be made of etymological and philological help rendered by Monsieur Paul Meyer, Membre de l'Institut, Paris, and Professor Eduard Sievers, of Leipzig, both Honorary Fellows of the British Academy. Pagan. *Etymol.* The explanation of L. *pāgānus* in the sense 'non-Christian, heathen', as arising out of that of 'villager, rustic', given by Orosius (a Spaniard) c 417, has been shown to be chronologically and historically untenable, for this use of the word goes back to Tertullian c 202, when paganism was still the public and dominant religion, and even appears, according to Lanciani, in an epitaph of the 2nd cent. The explanation is now found in the L. use of *pāgānus* as = 'civilian, non-militant', opposed to *miles* 'soldier, one of the army'. The Christians called themselves *militēs* 'enrolled soldiers' of Christ, members of his militant church, and applied to non-Christians the term applied by soldiers to all who were 'not enrolled in the army'. Cf. Tertullian *De Corona Militis* xi, 'Apud hunc [Christum] tam miles est paganus fidelis quam paganus est miles infidelis'. See also GIBBON xxi. *note*.

O.

O (*ō*), the fifteenth letter of the alphabet in English and other modern languages, and the fourth vowel letter. *O* was the fourteenth letter in the ancient Roman alphabet, corresponding in form and value to the ancient Greek *O*, derived from the sixteenth letter of the Phoenician and ancient Semitic alphabet, *ʕ*, *ʕ*, *ʕ* (Heb. *ʕ*), called *cain*, i.e. 'eye'. The latter represented a peculiar articulation or consonant, the 'glottal catch' (modern Arabic *ʕ*, *ʕ*), a sound unknown

to Greek, in which the symbol was appropriated to the vowel *o* (which the sound of Semitic *ʕ* in conjunction with *a* may have somewhat resembled). In early Greek, *O* was used for both short and long *o*; subsequently a new symbol *Ω*, *ω* (*O mega*, 'great *O*'), was added to the alphabet to distinguish long open *ō*, the original *O* (now known as *O micron*, 'little *O*') being then restricted to short *o*. From Greek times downward, this letter has regularly represented some variety or varieties of the 'mid-back-round' (or labial) vowel of Bell's Visible Speech scale. On account of its intermediate position, this vowel is (like *e*) liable to considerable variations of quality, and many languages distinguish, as practically different vowels, 'close' (or 'narrow') *o*, and 'open' (or 'wide') *o*; the former tending to approach, and at length to pass into, the still closer sounds *u*, *u*; the latter tending to fall into the still opener *ə*, *ə*.

In OE., short *o* and long *ō* were etymologically and phonetically distinct. Short *o* was originally both close and open. Short close *o* was normally derived from an original *u*, as in OE *oxa* ox, Skr. *uṣhāṇ*, OE. *dohtor*, Gr. *θυγάτηρ*, Indo-European **dhughstēr*. Short open *o* normally represented an earlier *a* before a nasal, as in OE. *on*, Goth. *ana*, Gr. *ἀνά*. This OE. *o* from *a(n)* is often distinguished for etymological purposes as *o*. OE long *ō* corresponded generally to Com. Teut. long *ō*, in which were combined Indo-European *ō* and *ā*, as in OE *bōc* beech, OTeut. **bōk*, Dor.Gr. *φάγος*, L. *fāgus*, OE. *fōd*, Goth. *fōdus*, Gr. *πλωτός* swimming. Long *ō* also arose out of a lengthening of short open *o* from *a(n)*, with *n* absorbed, as in *lōð* tooth, OTeut. **lamb*, Indo-Eur. **dont-*; *hōm* to hang, OHG. and Goth. *hāhan* from OTeut. **hagh-*, *χαγχ-*. Long *ō* was prob. originally both close and open, but in late OE. it must, from its subsequent history, have been close. In unstressed syllables, *o* was the ordinary OE representative of the obscure vowel (*ə*), and in this capacity it often varied with *a*, *e*, *u*.

In the Middle English period the distinction between open and close short *o* is no longer discernible; and the vowel was apparently always open *o* before a consonant in the accented syllable. Of long *ō* ME. had two distinct sounds, open and close. Open *ō* was the normal representative (in midland and southern speech) of OE long *ō* (or lengthened *a*), which passed through the sound of (*ō*) to that of (*ō*), being sometimes written in the 13th c. *oa*, but, eventually, simply *o*, or *oo*: thus OE. *māre*, *mān*, *ald* (*ald*), ME. *moare*, *noon* (1257), *more*, *non*, *old*. It often represented long

ō derived from Fr. or L., or arose out of an earlier short *o* in an open syllable, as OE. *hōpa*, ME. *hōpe*. ME. close *ō* represented OE. *ō*. This *ō* must have been a very close sound, for about the end of the ME. or beginning of the mod.Eng. period it passed into the sound of (*ū*), usually with the spelling *oo*, though sometimes with the simple *o* spelling, as in the words *do*, *to*, *lose*. ME. open *ō* either continued into mod.Eng. as *o* (*bone*, *ore*, *hope*), or was, from 16th c., written *oa* (*oak*, *oar*, *coal*), but in sound it became at length close and quasi-diphthongal (*ōu*), except before *r*, where it remains open (*ōer*). In the 13th c., *o* began to be written in certain cases for *u*, esp. before *m*, *n*, *u* (= *v*), as in *some*, *son*, *loue* (= *love*), OE. *sum*, *sinu*, *lufu*. This, which has largely survived into mod. E., was merely a *graphic*, not a *phonetic*, change.

The normal sound of short *o* is now (*ə*), low-back-round, varying with mid-back-round-wide (*o*), and low-back-round-wide (*o*); but it frequently stands for (*ə*), as in *son*, *doth*, or (*ə*), as in *word*; and in unaccented syllables sinks to (*ə*), as in *nation*. When original short *o* comes before *r* final, or *r* + consonant, as in *or*, *for*, *corn*, *sort*, it is now lengthened into the corresponding long sound *ō* (*ōr*, *for*, *kōrn*, *sōrt*). A still more recent lengthening of *o* often takes place in southern English before certain consonants, as in *cross*, *off*, *moth*, *soft*, and, being as yet only partially recognized, is here represented by *ō*.

The normal sound of long *ō*, as in *no*, *toe*, *bone*, is the quasi- or imperfect diphthong (*ōu*); but before *r*, as in *hore*, *choral*, *story*, the sound is that of the open quasi-diphthong (*ōer*). In London and the south of England, this *ō*, esp. when *r* follows in the same syllable, as in *ore*, *worn*, *porter*, is usually identified with the (*ō*) mentioned above as arising from ME short *o* before *r*. This is not the case, however, in the educated speech of the country as a whole, nor in America, and the sounds are still separated by most orthoepists (see Ellis, *E. E. Pronunciation*, I. 94-95), and in dictionaries generally; they are distinguished in this dictionary, as in *boarder*, *border* (*bōr·dər*, *bōr·dər*), *mount*, *morn* (*mōm*, *mōm*).

Hence, in modern English, the normal sounds of *o* are

- | | |
|--|------------------------------|
| 1. <i>ō</i> in <i>no</i> , <i>bone</i> | <i>nōu</i> , <i>bōun</i> |
| 2. <i>ō</i> „ <i>ore</i> , <i>glory</i> | <i>ōer</i> , <i>glō·rī</i> . |

| 3 a <i>ō</i> „ <i>soft</i> , <i>moth</i> | <i>sōft</i> , <i>mōp</i> . |
| 4. <i>ə</i> „ <i>rob</i> , <i>got</i> | <i>rəb</i> , <i>gət</i> . |

Exceptional sounds, due to special causes, and normally spelt otherwise, are

- | | |

| 5. <i>ū</i> (<i>u</i>) in <i>to do</i> | <i>tū dū</i> . |
| 6. <i>ə</i> „ <i>son</i> , <i>other</i> | <i>sən</i> , <i>ə·ðər</i> . |
| 7. <i>ō</i> „ <i>word</i> , <i>worthy</i> | <i>wōrd</i> , <i>wō·ðī</i> . |

No. 1 is also represented by *oa*, *oe* (final), *ou*, *ow*, *oh*, rarely *oo*; as in *load*, *hoe*, *soul*, *low*, *oh*, *brooch*. No. 2, by *oa*, *ou*, *ow*, rarely *oo*; as in *boar*, *pour*, *Gower*, *door*, *floor*. In *broad*, *oa* has the sound (*ō*).

The combination *oo* now normally represents long (*ū*), long (*ū*), short (*u*), as in *moon*, *moor*, *good*; exceptionally, it has the sound of 'short *u*' (*u*), as in *blood*, *flood*, or of 'long *o*' = Nos. 1 and 2 above.

Oi, *oy*, normally represent a true diphthong (*oi*), as *boil*, *boy*; or an imperfect triphthong, as in *Moir* (*moir·i*).

Ou, *ow*, also normally represent a diphthong (*au*), as in *out*, *house*, *now*, or an imperfect triphthong, as in *hour* (*au·r*). But *ou* has also various other sounds, as in *soup*, *tour*, *through*, *you*; *soul*, *pour*; *brought*, *cough*, *enough*; in unstressed final syllables it is commonly (*ə*), as in *favour*, *pious*.

In unaccented syllables, all the sounds of *o* are liable to shortening and obscuration, and tend to sink through *ou* or *oe*, *o* or *o*, to *ə*, *ə*, *ə*, as in *tobacco* (*ou*, *o*, *ə*), *anatomy* (*ə*), *dilatary* (*ə*), *sailor* (*-ər*), *comfort* (*ə*), *cannot* (*ə*), *parrot* (*ə*), *notion* (*ə*), *random* (*ə*).

The change of OE *o* to *ə* in ME. was a characteristic of the southern and midland dialects, and thus of Standard English. But the northern dialects retained *o*, the presence of which instead of *ə*, as in *stone*, *hane*, *mare* = *stone*, *home*, *mare*, is one of the most distinctive features of northern English and Scotch. In later times this *o* is often written *ai*, or *ae*, and narrowed to *ea*, *e*, *ee* (*e*, *ē*, *ē*, *i*). The change of OE *ō* to (*ū*), is also proper to Standard English and its related dialects, the sound having become in Scotch one akin to German *u* and *u*, or Fr. *eu* and *u*. This, like the English (*ū*, *u*) sound, is often written *ou*, but more distinctively *u* or *ui*, as in Eng. *good*, Sc. *good*, *gude*, *gud*. The northern dialects also retain the earlier (*ō*) for English (*au*); this is often written in Scotch, as in ME. *ou*, *ow*; but in modern times sometimes *oo*, as in *coo*, *about* = *cov*, *about*.

The fancy, frequent in authors of the 16th and 17th c., that the shape of the letter *O* represented the rounded form of the mouth in forming the sound, is seen from the history of the letter to be without foundation in fact.

-o, suffix of combining forms of words On the analogy of Greek combinations (in which the combining stem usually ended in -o, as thematic vowel or its representative, or as an addition to a consonant stem), and their adaptations and imitations in Latin, late and mediæval, like *Syro-phenice*, *Gallagrace*, *Gallohispan*, *Anglosaxonius*, etc., -o- has come to be, in modern Latin and in English, the usual connecting vowel in combinations, not merely in ethnic names as *Anglo-Saxon*, *Anglo-Indian*, *Indo-European*, etc., but in scientific terms generally; it is affixed, not only to terms of Greek origin, but also to those derived from Latin (Latin compounds of which would have been formed with the L. connecting or reduced thematic vowel, -i), especially when compounds are wanted with a sense that Latin composition, even if possible, would not warrant, but which would be authorized by the principles of Greek composition. Such are *concevo*, *convexo*, *cynbo*, *dolcho*, *oblongo*, *ovato*; *chloro*, *iodo*; *cirro*, *cumulo*; *occipito*, *pneumo*; *dramatico*, *economico*, *historico*, *politico*; *joco*, *serio*; etc.

1. The primary and etymological function of a combining form in -o is to qualify adverbially the adj. to which it is prefixed; as, in Gr., λευκόχλωρος 'whitely green', pale green; mod L. *ovato-cordatus* 'ovately heart-shaped', cordate with ovate modification; *Anglo-Norman*, Norman as modified in England. Such a comb. is, as it were, the adj. with adverbial qualification, belonging to a sb. with adj. qualification; thus, as to the qualified sb. *steady industry* (adj. + sb.) the corresponding qualified adj. is *steadily industrious* (adv. + adj.), so to *political economy* the corresponding adj. is *politico-economic*. Lord Campbell has used *lego-literary* in the sense 'pertaining to legal literature'.

2. But the use of these forms has been extended, so as to express, as by a kind of abbreviation, almost any manner of relation between the two components. *Anglo-French*, originally 'French of an English sort', 'French as established or spoken in England', is sometimes taken with the converse meaning of 'English settled in France', and commonly with that of 'English in alliance, conjunction, or partnership with French'; so *Franco-German* may even mean 'French in conflict with German', *Græco-Latin* 'common to Greek and Latin'; *pneumo-gastric*, 'communicating with both lungs and stomach'; *occipito-frontal*, 'reaching from occiput to forehead', or connecting these parts, *occipito-temporo-parietal*, 'including the occipital, temporal, and parietal (lobes of the brain)'; *gramino-carnivorous*, 'feeding on grass as well as flesh'.

3. This -o is used also, on Greek analogies, in word-formation. From its regular appearance before certain suffixal elements, as -cracy, -graphy, -logy, -meter, it tends to be treated practically as a part of these elements; hence, such expressions as 'the bureau-ocracy, shop-ocracy, trade-ocracy, and other -ocracies', 'a professor of all the -ologies', 'the last new -ology', 'galvanometers, lactometers, and other -ometers without number'.

[OE. *ate*, pl. *atan*, wk. fem., not found in the cognate langs., and of obscure origin. The general Teutonic name is OTeut. **hadron-* and its representatives: see HAYER]

Oat differs from other names of cereals, ancient or modern, as *wheat*, *barley* (hgg, beer), *rye*, *rice*, *maize*, *millet*, and from its own synonym *haver*, in that, while these are (like *dust*, *sand*, *snow*), names of *substances* or *things* in the mass, the collective form of which is singular, they having in ordinary language no plural, *oat* is an individual singular, the collective or mass sense of which has to be expressed by the plural, e.g. 'Is the crop rye or oats?', 'wheat, barley, and oats are cereals'. Comparing this with *beans*, *peasens*, *potatoes*, and other names of similar grammatical form, it

may be inferred that primarily *oat* was not the plant or its produce in the mass, but denoted an individual grain, of *gr. oat* with its collective pl. *groats*. This may point to oats being eaten originally in the grain, not, like wheat and barley, in the form of meal or flour. But the scanty early evidence is not sufficient to show this.]

Ob., abbrev. of *L. obui*, died; used before the date of a person's death.

Ob, *pref.* The Lat. prep *ob* 'in the direction of, towards, against, in the way of, in front of, in view of, on account of'. In combination with *vbs* and their derivatives, the *b* is assimilated to certain consonants, becoming *oc* before *c*, *of* before *f*, *op* before *p*, and *ap* before *m* (in *omittre*). In combination it has the following senses: a. In the direction of, towards; facing, in front of; as *obvertre* to turn towards, *obedire* to listen to.

b. Against, in opposition, as *occurrere* to run against, *opponere* to place against; often merely implying the injurious or objectionable character of an action. c. Upon or over; down upon, down, as *obducere* to draw upon or over, *obligare* to bind down, *occidere* to fall down d. Completely; sometimes pleonastic, as *obducere* to sweeten (completely), *obducere* to harden greatly; often with a colouring of sense a.

In English use, *ob-* (*oc-*, *of-*, *op-*, *o-*) occurs

1. In combinations already formed in Latin in the senses above-mentioned; rarely in words formed in Eng itself on Latin elements, e.g. a. *obedience*, *obversion*; b. *object*, *occur*, *opponent*, *opposite*; c. *obduce*, *occurrent*; d. *obducate*, *obducate*.

2. In mod. scientific Latin, and hence in Eng, in Botany, etc., *ob-* is prefixed to adjs in the sense 'inversely', or 'in the opposite direction'; e.g. *obcordatus* (Linnæus), *obcordate*, i.e. cordate with the base or broad end presented, *obovate*, ovate or egg-shaped with the wider end presented; *obtriangular*, triangular with the apex downward. See below *OBCLAVATE* to *OBTURBATE*.

This is not an ancient L. use, where *ob-* was rarely combined with an adj., the chief example being *oblongus* *Oblong*, which could hardly be in sense the model for these words. Apparently the prefix represents the *ob-* of the adv. *obversè* *OBVERSELY*, and is an abridged representation of that word.

4. *Obacerate, v.* *Obs. rare* [*f. ppl stem of L. obacere* to contradict. (Derived according to some Lat. grammarians from *acus*, *aces* - chaff.)] Hence *1 Obaceration*, a stopping one's mouth.

2. *Philos.* Used of the existence or nature of a thing as an object of consciousness (as distinguished from an existence or nature termed *subjective*).

The Scholastic Philosophy made the distinction between what belongs to things *subjectively* (*subjectivus*), or as they are 'in themselves', and what belongs to them *objectively* (*objectivus*), as they are presented to consciousness. In later times the custom of considering the perceiving or thinking consciousness as pre-eminently 'the subject' brought about a different use of these words, which now prevails in philosophical language. According to this, what is considered as belonging to the perceiving or thinking self is called *subjective*, and what is considered as independent of the perceiving or thinking self is called in contrast *objective*. As to this transition of use (which primarily concerns the word *subjective*, and affects *objective* as its antithesis) resulting in what is almost an exchange of sense between the two adjectives, see HAMILTON *Reid's Wks.* 806 note, R. L. NETTLESHIP *Philos. Lect. & Remains* I. 193.

† a. Opposed to *subjective* in the older sense = 'in itself'. Existing as an object of consciousness as distinct from having any real existence; considered only as presented to the mind (not as it is, or may be, in itself or its own nature). *Obs.*

(1899) 168 'In the beginning was the Word', there was must signify an actual existence, and if so, why in the next sentence ('the Word was with God') shall the same verb signify an objective being only? 1797-41 CHAMBERS *Cycl. Objective*.. is used in the schools in speaking of a thing which exists no otherwise than as an object known. They are, therefore, such as we see and perceive them: Their real and objective natures are, therefore, the same.

b. Opposed to *subjective* in the modern sense: That is or belongs to what is presented to consciousness, as opposed to the consciousness itself; that is the object of perception or thought, as distinct from the perceiving or thinking subject; hence, that is, or has the character of being, a 'thing' external to the mind; real.

This sense is occasional in writers of the later 17th and early 18th c. (the early examples being more or less transitional), but its current use appears to be derived from Kant, and to appear in Eng. subsequently to 1790, and chiefly after 1817 (see quot. from Coleridge).

1855 FITZ. STEPHEN in *Camb. The accusative and dative of earlier Eng. Occamism (p̄kāmizəm), [f. name *Occam* or *Ockham* + -ISM.] The doctrine or system of the English scholastic philosopher, William of Occam, who lived in the first half of the 14th c., called in later times the 'Invincible Doctor'.

Occam was a pupil of Duns Scotus, but rejected and opposed the Realism of his master, forming a new speculative sect who revived the tenets of Nominalism. He maintained

that general ideas have no objective reality out of the mind, but are merely a product of abstraction. His teachings prepared the way for the overthrow of scholasticism.

[*Note.* The disuse of this verb in the 17th and most of the 18th c. is notable. Against 124 quotes for 16th c., we have for 17th only 8, outside the Bible of 1611 (where it occurs 10 times), and for 18th c. only 10, all of its last 33 years. The verb occurs only twice (equivocally) in Shakespeare, it entirely absent from the Concordances to Milton and Pope, is not used by Gray, all Johnson's quotes, etc. are from the Bible of 1611. It was again freely used by Cowper (13 instances in Concordance). This avoidance appears to have been due to its vulgar employment in sense 8 of 1597 SHAKES *2 Hen IV.* II. iv. 161. 2. One of the main areas or regions into which this body of water is divided geographically.

These divisions are partly natural, through the intervention of portions of land, partly arbitrary for geographical convenience. It is usual to reckon five of them, the *Atlantic*, *Pacific*, *Indian*, *Arctic*, and *Antarctic* Oceans, of which the first two are sometimes subdivided into Northern and Southern. But the Pacific, Indian, and Antarctic really form one great ocean, the 'South Sea'; of which the Atlantic and Arctic again form a smaller prolongation, divided from the larger basin only by an imaginary line drawn between the southern points of Africa and America. The name *ocean* was formerly given to smaller portions of some of these, the North Sea has still the synonym *German Ocean*.

Od, 'od (pd). Also odd. A minced form of *God* (God sb 13, 14, GAD sb 5), which came into vogue about 1600, when, to avoid the overt profanation of sacred names, many minced and disguised equivalents became prevalent. Very frequent in 17th and early 18th c.; now arch. and dial.

1. Used interjectionally, by way of asseveration: cf. *GAD* sb 2, *GOD* sb. 13. Still dial. (with little or no consciousness of its origin).

2. The possessive 'od's (od's, odds, also ADS, UDS) occurs like *God's*, *Gad's*, in many asseverative or exclamatory formulæ. See *GOD* 14 a, b, c, *GAD* 5 3.

The origin of 'od's being forgotten, it was written *ods*, *odds*, or run together with the following word, as *ods-ads*.

Among the phrases (now mostly obs., arch., or dial.) are 'od's blood, body, bones, death, feel, flesh, foot, life, mercy, truth, vengeance, blessed with, wounds, etc.; also with diminutives and perversions of words, as 'od's bob, bobs, bodkins, bud (=blood), fish, odshid, odd's lifelings, odswings, odsnouns, odsoons (=wounds), od's-pittkins, pittkins, pittkins (pity), od's swicks, odswicks (=hooks), -sookers (=swookers),

Od ² (pd, pūd). [Arbitrary term: see quot. 1850]
A hypothetical force held by Baron von Reichen-
bach (1788–1869) to pervade all nature, manifest-
ing itself in certain persons of sensitive temperament
(streaming from their finger-tips), and exhibited
especially by magnets, crystals, heat, light, and
chemical action; it has been held to explain the
phenomena of mesmerism and animal magnetism.
Also *attrib* as *od force*, etc. (Cf. ODYLE.)

1850 ASHBURNER tr *Reichenbach's Dynamics* 224, I will
take the liberty to propose the short word *Od* for the force
which we are engaged in examining. Every one will admit
it to be desirable that a unsyllabic word beginning with a
vowel should be selected, for the sake of convenient con-
junction in the manifold compound words. 1851 H. MAYO

Odder, compar. of ODD *a.*; obs. form of OTHER.

Oddfellow, **Odd-fellow**. [A fanciful appellation. cf. ODD *a.* 9b.] A member of a society, fraternity, or 'order', organized under this name, with initiatory rites, mystic signs of recognition, and various 'degrees' of dignity and honour, for social and benevolent purposes, especially that of rendering assistance to members in sickness, distress, or other need.

The name 'Odd Fellows' appears to have been originally assumed by local clubs formed in various parts of England during the 18th c. for convivial and social purposes, usually with rites of initiation, passwords, and secret ceremonies, supposed to imitate those of Freemasonry. Associations of these clubs were formed from time to time for purposes of mutual recognition, of which that styled the 'Independent Order of Oddfellows, Manchester Unity', formed about 1813, has grown into a vast organization, having local branches or 'lodges' throughout Great Britain and the Colonies, as well as in the United States and some foreign countries. Besides this, there are numerous smaller societies of the same 'order' in Great Britain and the Colonies; a distinct federation also exists in the United States, which, beginning in 1819 in connexion with the Manchester Union, separated from it in 1842, and is now a great and important organization.

1811 *Las-Bai, Odd Fellows*, a convivial society; the introduction to the most noble grand, arrayed in royal robes, is well worth seeing at the price of becoming a member 1854 THOREAU *Walden* viii (1886) 170 Men will if they can, constrain him to belong to their desperate odd-fellow society 1887 *Pall Mall G* 2 Sept 87/2 A great gathering of Oddfellows was held last evening at the Masons' Hall tavern... to welcome the grand master of the Manchester Unity 1887 *Scotsman* 16 May 6/5 A General Council Meeting of the Scottish Order of Oddfellows' Friendly Society was held on Saturday at the Oddfellows' Hall, Edinburgh

Hence **Oddfellowship**, the status of an Odd-fellow; the principles and organization of the 'Oddfellows'

Odds (*q*dz), *sb.* Also 6-7 *oddes*, *ods*, (6 *Sc.* *oddis*, *odis*, 7 *odd's*, *pl odds*). [app. pl. of ODD *a.* taken subst.: cf. *news*. In 16th c. regularly, and in 17th and 18th c. usually, construed as a singular, 'the odds *is* or *was*'; an isolated instance of 'the odds *were*' appears in 1614, but this construction is unusual before the 19th c.]

It is somewhat difficult to comprehend how the plural of *odd* came to be taken to express the sense 'difference', and also how a word originally plural should, while still retaining the plural form, have been so constantly viewed and construed as singular. The most likely explanation is that *odds*, *oddis* first meant 'odd' or 'unequal things' (cf. *news* = 'new things or matters'), a relic of which appears to exist in the phrase 'to make odds even' found in the earliest quotation. But the notion of two odd or unequal things so essentially involves that of the relation between them as easily to pass into that of 'inequality' or 'difference', as it perhaps already did in the phrase in question, and as is fully developed in sense 2. After the sense 'difference' was once established, the plural character of the word might be lost sight of, the more easily that in this sense no singular was in use, nor, from the suggested origin, possible. We may compare the history of *news*, *means*, *true* &c.]

1. a. In reference to ancient literature (and in some early uses of the word in English): A poem intended or adapted to be sung; e.g. the Odes of Pindar, of Anacreon, of Horace. *Choral Odes*, the songs of the Chorus in a Greek play, etc. b. In modern use: A rime (rarely unrhimed) lyric, often in the form of an address; generally dignified or exalted in subject, feeling, and style, but sometimes (in earlier use) simple and familiar (though less so than a *song*).

It rarely extends to 150 lines, and some poems so named are quite short, though prob. the name would not now be given to such. The metre in longer odes is usually irregular (e.g. Dryden *Alexander's Feast*, Wordsworth *Intimations of Immortality*), or consists of stanzas regularly varied (Gray's *Pindaric Odes*), but, in shorter 'odes', sometimes of uniform stanzas (Gray's shorter odes).

2. *Gr. Church.* Each of the nine Scripture canticles; also, each song or hymn of a series called the *canon of the odes*.

1881 L.N. SELBORNE in *Encycl. Brit.* XII. 580/1 The system [of Greek hymnody] has a peculiar technical terminology, in which the words 'troparion', 'ode', 'canon' chiefly require explanation. The *troparion* is the unit of the system, being a strophe or stanza .. divisible into verses or clauses, with regulated casuras. An *ode* is a song or hymn compounded of several similar *troparia*—usually three, four, or five. A system of three or four odes is 'triodion' or 'tetradion'. A canon is a system of eight (theoretically nine) connected odes, the second being always suppressed.

|| Oe (*du*). *1 are* = 1. [*f.* For Da. *oe*, o = Norw. *øy*, Icel. *ey*, OE. *æg*, 181e, 181et.] A small island.

1817 SCOTT *Harold* III. x. The bold Baltic's echoing strand Looks o'er each grassy *oe* [prime grow]

Oe, another form of OY Sc., grandson.

Oe, obs variant of O sb. 1, O adj. one, O vb.

OE (in the earliest times, and now often, written separately *oe*) was in Early Old English the symbol of the *u*-umlaut of *o*, as in *fat*, *foet*, *soecan*, *ahtan*, *oeltan*, doubtless originally sounded like Gr. *ō*, *ē*, but afterwards written (and sounded) simply *e*, *ē*, in which form it came down into Middle English.

In modern Eng. *oe*, *oe* reproduces the usual L. spelling of Gr *oi*, which often in med.L. and in Romanic, was treated like simple *e*. In words that have come into Eng. through med.L. or Fr. or other Romanic langs., Eng. has usually a simple *e*, as in *economy*, *F. économie*, *L. economia*, *Gr. oikonomia*; *penal*, *F. pénal*, *L. panālis*, *f. pana*, *Gr. nouñ*; *cemetery*, *L. cimetarium*, *Gr. κοιμητήριον*; but in recent words derived immediately from L. or Gr. *a*, *oe* is usually retained, esp. (1) in proper names, as *Edipus*, *Enbea*, *Phæbe*; (2)

in words referring to classical antiquities, as *acis*, *Pacale* (in which, however, some represent Gr *oi* by *oi*, as *oikist*); (3) in scientific and technical terms, as *amaba*, *anosthera*, *astrus*, *diacous*, *diarrhaa*, *homocopathy*, *pharmacopæia*, *onomatopœia*; but there is a tendency, stronger in America than in Great Britain, to substitute *e* for *oe* in these words when they pass into popular use or become familiar, e. g. *diarrhea*, *esophagus*, *homeoid*. This being orig. a diphthong and subsequently a long vowel, is usually pronounced as 'long e' (ē), rarely as 'short e' (e); when changed to *e*, it submits to the same usages as ordinary *e* from Gr. and L.

In French, *oe* is an occasional etymological or orthographical substitute for *e* in the diphthongs *ai*, *au*, as in *œuf*, *œur*; when these words are borrowed in Eng. they retain the Fr. spelling. *œ*, *œ* also occasionally represents Ger *ö*, *œ* (*Goethe*), and the *o*, *ø* of Scandinavian tongues (*Jaeger*).

Œcist (*f* sist), œkist (*f* kist). Also oikist.

 approach branch II) It is also occasional with ppl adjs. in

 origin, as in born of. Eng of and by correspond somewhat

24. Between two sbs in sense-apposition.

a. in the sense 'in the person of; in respect of being, to be, for' arch.

The leading sb. is the former, of the qualification of which the phrase introduced by *of* constitutes a limitation; thus 'he was the greatest traveller of a prince', i.e. the greatest traveller in the person of a prince, or so far as princes are concerned. The sense often merges on that of the partitive genitive, 43.

1470-85 *MALORY Arthur* iii. xv. He was a ryght good knyght of a yonge man. *Ibid* xxi. xii. The trewest lover of a synful man that euer loved woman. 1590 *HAKLVT Voy II*. Lett* (1792) II. clxxxiii 137 Allowed to be the best scholar of a gentleman in England. 1871 *R. ELLIS Catullus* xlix. 1 Greatest speaker of any born a Roman, Marcus Tullius.

b. in the sense 'in the form of'.

The leading sb. is the latter, to which the prec. sb. with *of* stands as a qualification, equivalent to an adj., thus 'that fool of a man' = that foolish man, that man who deserves to be called 'fool'; 'that beast of a place' = that beastly place. a 1450 *Kut de la Tour* (1868) 38 Here is a faire body of a woman. 1599 *NASH Letten Stuffs* 57 Some euill spirit of an heretique it is. 1663 *BUTLER Hud.* i. iii. 337 'Twas a strange riddle of a lady. 1683 *EVELYN Mem.* 5 Dec. That scamp of a husband of hers. *Mod*. An angel of a woman. A gem of a poem. A duck of a hat (*collog.*).

+ 25 Indicating a person in whom one has, finds, or loses something. = in the person of. *Obs.* (supplied by 11).

1470-85 *MALORY Arthur* xv. vi. Thow hast not thy pyere [peer] of any ethely synful man. 1496-7 *Plimpton Corr* 122 Ye have a great treuour of Mr Gascoyne. 1523 *LD BERNERS Frouss.* I 63r The towne of Gaunte hath lost of hym a right valyant man. 1601 *SHAKS All's Well* i. 7 You shall find of the King a husband Madame, you sir a father. *Ibid* iv. ii. 65 You have wonne A wife of me. *Ibid* v. iii. 1 We lost a leuall of her. 1651 *C. BROOKE Fool of Qual.* (1809) II. 233 We shall have a heavy loss of our friend Ned. 1820 *BYRON Wks* IV. 347 A precious representative I must have had of him.

b. Of things, as in 'to have a bad time of it'.

Of appears orig. to mean 'consisting of' or 'comprised in' the fact or circumstance referred to.

1643 *TRAPP Comm Gen xxxii. 31* Our Captain had a bloody victory of it. 1670 *R. MONTAGU in Budeuch MSS* (Hist. MSS Comm.) I. 485 Conte de Grammont had a trouble-some journey of it. 1741 *RICHARDSON Pamela* II. 32 What a fine time a Person would have of it. 1874 *RUSKIN Fors Clav* xv. 3 Living quite as hard a life of it. *Mod*. VIII Indicating the subject-matter of thought, feeling, or action, i.e. that about which it is exercised.

26. In sense: Concerning, about, with regard to, in reference to. After verbs, substantives, and adjectives.

a. After intransitive verbs; esp those of learning, knowing, thinking, and expressing thought, as *hear, read, know, think, dream, judge, tell, relate, write*, and the like. In subject-headings, titles of chapters, etc., often without a vb. as 'Of Snakes in Iceland'; here, *of* is now often omitted. To these may be added such as *joy, complaint, doubt, despair*, etc., which are closely akin to IX.

Rare in OE. (which commonly used *be*, or with some vbs. the genitive), but *of* occurs after *segen* to tell, and in late OE. after *specean* to speak.

IX. Representing an original genitive dependent on a verb or adjective.

Many vbs. and adjs. in OE. were followed by a genitive case as an object or complement. In Latin, also, many adjs. and some vbs. were construed with a genitive, represented in French by *de*. These are represented in Middle and *Mod* English by construction with *of*. Such of these as now attach themselves closely in sense to one or other of the preceding branches, have been there mentioned, but there remain many verbs and adjs. after which *of* has hardly more than a constructional force, or in which it does not clearly fall under any of those branches. Many of these come close in sense to branch VIII, while others, esp. the adjs., often approach or coincide with the objective genitive in branch X. It is convenient therefore to consider them here.

29 In the construction of verbs

a. After intrans. vbs. Many of these in OE. took the genitive, and are found with *of* in Middle and Early Modern English, but this is now rare, except where *of* falls in sense under one of the branches already treated; instances are to *reck, repent, rue, bewave* (orig. *be wære*) of Verbs of sense, e.g. *feel, smell, taste, touch* (still with *of* in dial. or vulgar use), verbs of asking, as *ask, beseech, demand, desire, entreat*, and others, e.g. *distinguish, esteem, forget, like, sense*, formerly construed with *of*, now take a simple object; some, as *accept, admit, allow, approve, conceive, recollect, remember*, still have both constructions; with others, as *hope, look, thirst, wait*, etc., *of* has been displaced by *for* or some other preposition.

1340-70 *Alex. & Dind* 868 No [= ne] like no lud of his lupur fare. c 1380 *WYCLIF Sel. Wks.* III. 361 Þe assolyng serueþ of nouȝt. c 1450 *St. Cuthbert* (Surtees) 5287 To pray to god and saynt cuthbert Off help. 1523 *LD. When I felt of his heart, there was no beat. 1888 *BYRON Amer. Connex* i. xiv 194 Resolutions which perhaps no single member in his heart approves of.

b. After transitive vbs., the secondary or thing-object is often introduced by *of* representing an original genitive. Such are *balk, cheat, defraud, disappoint, frustrate, accuse, arrest, blame, convict, suspect, possess, sense* (a person of); *avail, belunk* (oneself of), also with impersonal vbs. as *it repents me of*; and formerly with *ask, beg, beseech, thank* (a person of), etc.

XIV. In the sense *Belonging* or *pertaining* to; expressing possession and its converse: 'the owner of the house', 'the house of the owner'

Formerly expressed by the genitive, and still to some extent by the possessive case (with transposition of order) The use of *of* began in OE. with senses 47, 48, expressing origin After the Norman Conquest the example of the French *de*, which had taken the place of the L. genitive, caused the gradual extension of *of* to all uses in which OE. had the genitive; the purely possessive sense was the last to be so affected, and it is that in which the genitive or 'possessive' case is still chiefly used. Thus, we say *the King's English*, in preference to *the English of the King*; but *the King of England* in preference to *England's King*, which is not natural or ordinary prose English.

47. Belonging to a place, as a native or resident.

This occurs in OE. with the sense of origin = 'springing or coming from, belonging by origin to' (properly 11 b), in the 11th c this passed into the sense 'belonging to as inhabitants or occupants', 'living in', and so of things 'situated in or at'.

[Originally the same word as OF, as explained under that word; *off* being at first a variant spelling, which was gradually appropriated to the emphatic form, i. e. to the adverb and the prepositional senses closely related to it, while *of* was retained in the transferred and weakened senses, in which the prep. is usually stressless and sinks to (əv) *Off* appears casually from c1400, but *of* and *off* were not completely differentiated till after 1600 cf. A. 3, B. 1.]

In this article are included all examples of the *adv*, whether under (a) the earlier spelling *of*, or (b) the later *off*; but, of the prep., only those uses for which *off* is now the recognized form; for others see OF

Off-, prefix. The adv. *off* occurs in combination with verbs, ppl. adjs., vbl. sbbs., and other sbbs. In earlier times, it was written *of-*, as explained under *OF- pref.* 2, but such of the ME. compounds, as survived into modern Eng. were then written *off-*, which is the only form found in recent compounds. In verbs, generally, the combination is very loose (see 1 below); in participles used as adjs. the union is closer, and in vbl. and other sbbs. it becomes permanent, though combinations of this kind can be formed at pleasure whenever the sense requires. In a few cases, the combination is so specialized in sense, or otherwise important, as to require treatment as a main word. In verbs, the stress is now usually upon the root; in the other classes (2-4) on *off-*.

1. With verbs, off- (ME. of-) enters into quasi-combination, chiefly as a separable particle, like Ger. ab- in ab-reisen, ab-schreiben, etc., in which the particle stands before the vb. only in certain syntactical conditions. In ME. of was frequently put before the vb. in the infinitive, as in *of glide, of heve*, and in this position (though usually written as a separate word in the MSS.) is often hyphenated by modern editors (*of-glide, of-hew*); modern prose usage prefers the order *glide off, hew off*; but in the pples. the adv. is still sometimes put first, and is then sometimes hyphenated to the vb. (as is regularly done in 2). ME. examples are the obsolete *of-cwell, of-quell* (to kill off), *of-off-drive, of-glide, of-hew, of-hurl, of-race* (to pluck or tear off), *of-rive, of-shear, of-shred, of-smite, of-surge* (to cut off with a sweep of the sword),

of-tear, of-turn, of-twitch, of-weave (to twist off), of-wip (to whip off). Later examples are off-chop, off-off-shake, off-stand, off-trench, etc., but these are exemplified chiefly in the pa. pple., where the hyphen may be regarded as simply syntactical as in 2. See also OFF-DRIVE, OFF-LOAD, etc.

Official (*ŏf'i-si-nāl*), *a. and sb.* [ad. med. L. *officialis*, f. *officina*: see *prec.*]

Officina, in ancient L. 'a workshop, manufactory, or laboratory', was applied in med. L. also to a store-room of a monastery in which provisions, medicines, or necessities of any kind were kept for use, in later use it seems to have been extended, like 'shop', from a work-shop to a sale-shop. In monastic L. *officiarius domus*, *officinalis*, occurs also in the same sense as *officina*. As used of herbs and drugs, it is not quite clear whether *officinalis* meant 'of the sort used in the pharmaceutical laboratory', or 'of the sort kept in the shops of herbalists and druggists', the resultant sense, 'used or recognized in pharmacy or medicine', being the same in either case.]

A. adj. 1. Of a herb, plant, drug, etc.: Used in medicine or the arts. Of a medical preparation: Kept in readiness in apothecaries' shops; made according to the recipe prescribed in the pharmacopœia. Of a scientific name. Adopted by the pharmacopœia.

As applied to plants, it answers to the Linnean specific name *officinalis*, -*ale*, given to that species of a genus which has been used in medicine, and known 'in the shops' by the generic name, e.g. *Anchusa*, *Borago*, *Pulsinaria officinalis*, *Lithospermum*, *Symphoricarpon officinale*, = *Anchusa* of the shops or herbalists, Common Alkanet, etc.

In the transferred sense, 'recognized by the pharmacopœia', *official* has been recently superseded by OFFICIAL (s.b.).

The use of *ogee* as the name of a moulding and curve is exclusively English, and the history of this is not clear, but it seems possible that the 'ogee moulding' was so called by workmen as being the usual moulding employed in ogives or groin-ribs, in which it is a development of the roll-and-fillet (see *Paley, Gothic Mouldings* (ed. 1863), 33, 35, 48, 52).]

2. *Arch. and Joinery*. A moulding consisting of a continuous double curve, convex above and concave below; a cyma reversa.

In cross-section, its outline is a sort of S shape when the moulding (with reference to the solid on which it is worked) is towards the observer's left hand, and like this reversed when towards his right. If the S outline is towards his right, or the reversed shape towards his left, the moulding is termed a back-ogee, a cyma, or a cyma recta. An inverted back-ogee (frequently used as a base-moulding to a wall or plinth), and an inverted ogee, are such mouldings respectively turned upside down. The double-curved fall of a piano is a familiar example of the inverted ogee. The term ogee is sometimes applied to all the above curves indiscriminately.

1. An alphabet of twenty characters used by the ancient British and Irish; the system of writing, or an inscription written, in such characters; also one of the characters themselves.

The characters consist each of a thin line or stroke, or a group of from two to five such parallel strokes, arranged along either side of, or drawn across, a continuous medial or guiding line. Thus *δ, ι, υ, ρ, ρ, ρ, ρ, ρ*, are represented by 1, 2, 3, 4, 5 strokes under the line; *κ, ρ, δ, ι, ρ, ρ* by the same above the line; *μ, ρ, ρ, ρ, ρ, ρ* by long strokes crossing obliquely, thus *ρ, α, ο, η, ε, ι* by short strokes crossing at right angles. In inscriptions, the edge of a squared stone usually serves as the continuous base line.

The alleged instance of 1527 in Hatz-Darm. is an error. The OSp reprs of *Orcus* were *huero* (Percival), *huero*, *uero* (Dier), Mod.Sp. *ogro* 'ogre' is from Fr. || **Ohm** (ohm), [Ger. = A.M.] An obsolete German liquid measure equivalent to from 30 to 36 gallons according to the locality.

1851 *LONGF. Gold. Leg.* iv. *Convent Hirschman*. It comes from Bacharach on the Rhine. And costs some hundred florins the ohm (vine Rome).

Ohm ² (ohm). *Electr.* [From the name of the German physicist Georg Simon Ohm (1787-1854), who determined mathematically the law of the flow of electricity (*Ohm's law*).] The unit of electrical resistance: see *quots*.

"It was in this country that the term 'ohm' or 'ohm', suggested by Sir Charles Bright and Mr. Latimer Clark at the meeting of the British Association in Manchester in 1867, first came into use as the name of a decimal multiple of the absolute unit of resistance convenient for practical purposes. At the Congress of Electricians in Paris in 1881, the Ohm was unanimously adopted as an international standard." *Nature* 14 Feb. 1889, 368/2

1870 F. L. POPE *Electr. Tel.* iii. (1872) 25 The Ohm is equivalent to about $\frac{1}{10}$ of a mile of galvanized No. 9 iron wire. 1876 PRENCE & SIVELY *Telegraph* 5 It is convenient to use a symbol to represent the ohm as we use $^{\circ}$ to represent degrees, and 'minutes. The symbol used by us is ω , the Greek omega. Thus we say that the resistance of a wire between London and Birmingham is 1500 ω . 189a *Gloss Electr. Terms in Lightning* 3 Mar. Suppl. The Ohm is the resistance of a column of mercury of a constant section of one square millimetre and of a length of 106.3 centimetres, at the temperature of melting ice.

Hence **Ohmad** = OHM; **Ohm-a-mmeter**, an instrument for measuring electrical current and resistance, a combination of an ammeter and an ohmmeter; **Ohmic** *a*, pertaining to or measured by the ohm; **Ohmmeter**, an instrument for measuring electrical resistance in ohms.

1866 R. M. FERGUSON *Electr.* 157 This is called the B. A. Unit of resistance 1864, or an Ohmad. 1889 *Electr. Rev.* 11 Oct. 411 At present Dr. Fleming and a few others talk of 'ohmic' resistance, to distinguish resistance from the relation between the back electromotive force and the current. 1891 *Electrician's Primer* No. 12. 8 Ohmmeters indicate the ratio of the pressure between the ends of a conductor to the current passing through that conductor.

-oid (*oid*, *oid*), *suffix*, ad. mod L. *-oides*, Gr. *-oidēs*, i. e. -o- of prec. element or connective + *-ids* 'having the form or likeness of', 'like', f. *ēidos* form; cf. L. *-iformis*: see -FORM. (A parallel Gr. formative was *-oidēs*: see -ODE.) Examples: *albuminoidēs* (*albuminoidēs*) 'like blood, of the appearance of blood, hæmatoid'; *anthropoidēs* 'of human form, manlike, anthropoid'. In other mod. langs., as in Gr. and L., the *o* and *i* make distinct syllables (L. *anthropoidēs*, F. *anthropoïde*, Ger. *anthropoid*); in Eng. also, some pronounce (*æntrəpəpəid*), but the prevalent pronunciation of the suffix (and in many words, as *alkaloid*, *asteroid*, the only one) is with the diphthong (*oi*) as in *word*.

Extensively used in scientific terms, taken from Greek prototypes, or formed on Gr. (rarely L.) words. These are primarily adjs with the sense 'having the form or nature of, resembling, allied to'; but also (as sometimes in Gr.) *sbs.*, in the sense of 'something having the form or appearance of, something related or allied in structure, but not identical'. The *sbs.* are esp. numerous in Mathe-

matics, where, in imitation of *rhomboid* (Gr. *ῥομβοειδής* approaching a lozenge (*ῥόμβος*) in shape, a rhomboid) and *trapezoid* (Gr. *τραπεζοειδής* having somewhat of the form of a table (*τράπεζα*)), the suffix has been used to form the names of many geometrical figures.

Examples—(adj.) Anat. *adenoid*, *arachnoid*, *arytenoid*, *coracoid*, *hyoid*, *sigmoid*, *thyroid*. Zool. *amphiboid*, *anthropoid*, *canceroid*, *crinoid*, *echinoid*, *hydrinoid*, *ichthyinoid*, *medusoid*, *smutoid*; Bot. *ovoid*, *scorpioid*. The mod L. *-oida*, *-oidea*, *-oides*, *-oider*, *-oidous* (Eng. *-oidous*), are derivatives of *-oidēs*, *-oid*. *-oidal*. Oidematous, variant of EDEMATOUS.

Oidium (*oi* *dīzm*). Bot. [mod L., f. b. with *an* and *pl*, indicating a particular kind or different kinds.

The oils constitute a very large group of natural substances, of animal, vegetable, or mineral origin. They are divided into three classes: (1) *Fatty or fixed oils* (see FATTY 6, FIXED 4), of animal or vegetable origin, which (in common with *fats*) are chemically triglycerides of fatty acids, and produce a permanent greasy stain on paper, etc.; these are subdivided into *drying oils*, which by exposure to air absorb oxygen and thicken into varnishes, and *non-drying oils*, which by exposure ferment and become rancid; they are used as lubricants, as illuminants, in making soap, and for various other purposes. (2) *Essential or volatile oils* (see ESSENTIAL a. 5 b), chiefly of vegetable (sometimes of animal) origin, which are acrid and limpid, and form the characteristic odorous principles of plants, etc.; chemically, they are hydrocarbons, or mixtures of hydrocarbons with resins, etc.; they are extensively used in medicine and perfumery, and in some cases, in the arts. (3) *Mineral oils*, which are chemically mixtures of hydrocarbons, and are used chiefly as illuminants.

Drying oils contain glycerides of linoleic and similar unsaturated acids.

-ol, suffix, used to form chemical terms.

1. The termination of *alcohol*, used to form the names of substances which are alcohols in the wider sense (ALCOHOL 5), or compounds analogous to alcohol; e. g. *carbinol* (methyl alcohol), *methol*, *pseudol*, *glycol* (2-atomic alc.), *glycerol* (3-atomic alc.), *phenol* (phenyl or benzene alc.), *naphthol* (naphthyl alcohol), etc. In some cases this systematic nomenclature has not displaced the name which the substance had previously received, e. g. *glycerol* is more commonly known as *glycerin* (or, commercially, *glycerine*).

2. From *phenol*, the ending has been transferred to bodies belonging to the group of *phenols* (which are alcohols), as *anthranol*, *anthrol*, *cresol*, *cymenol*, *eugenol*, *thymol*, &c. as to some other phenol derivatives, as *anethol*, *cresol*, *guaiacol*, *phenetol*, *phlorol*, *pyrogallol*, *vetivrol*, *xylenol*.

3. In some words -ol is a deriv. of L. *oleum* oil; in which case it is more systematically written -ole; e. g. *furfural*, *indol*, *oxindol*, *pyrrol*, *terpinol*.

Old (ōld), a (adv., sb.) Forms: see below. [Com. Teut.: Early ME. *old*:—OE. *ald* (WSax. *ald*) = OFns and OS. *ald* (MDu. *out*, *oud*, Du. *oud*, MLG. *old*, LG. *oll*); OHG. (MHG., Ger.) *alt*:—OTent. **aldō-s*, orig. a ppl. formation (corresp. to Gr. forms in -*ros*, L. -*rus*) from OTeut. vb. stem *al-*, Goth. *al-nan* to grow up, ON *al-a* to nourish, bring up, cognate with L. *al-ere* to nourish: cf. *COLD* a. OTeut. **aldōs* was thus app. = 'grown up, adult', corresp. in form to L. *altus* grown or become great, tall. ON. wanted the positive (supplied by *gamall*; comp. *eltri*, superl. *eltri*); Goth. had the related derivative form *alpeis* (—**alþjos*). The original OE. form *ald* (also in Early WSax. and Early Kent.), remained in Anglian, and has come down in Northern dial. in later Sc. written *auld*, *auld*, in north. Eng. dial. *aud*, *aad*, *ahd*. In midl. Eng., OE. *ald*, lengthened to *āld*, became regularly *ōld* (cf. *bold*, *cold*, *hold*, *solid*, *told*), which remains the standard Eng. form (in ME. also written *oid*, in dial. *wold*, *ould*, *ould*, *oud*). The WSax. and Kentish *ald* came down into ME as *cald*, *yeald*, *yald*, *celd*, *eld*; it is now extinct (but cf. *ELD* a.). The original comparative and superlative, still retained in particular uses, are ELDER (—**aldra*), ELDEST, q. v.; in the general sense these have been superseded by *older*, *oldest* (see also ALDER, ALDERN). Derivatives are †ALD, †ALDER sb.2, ALDERMAN, ELD sb.2, v., ELDER sb.3.]

4. The numeral and sb. were in OE. in genitive as an advb. determination of *eald*, e.g. *þingæs geara eald* (cf *Gen. dres* take alt, *ens tags alt*, *E. ðeg de trente* alt); but by the 12th c. the genitive inflexion was dropped, cf. *quots*. 1110-1200. See also b.

b. The expression 'x years old' may be preceded by a prep., as if it were a sb. phrase = 'the age of x years': e.g. 'a child of ten years old', 'from two years old and under', 'at, under, or over six months old'.

This construction appears first with *of*, which may possibly represent the OE. (and Com. Teut.) genitive phr., or the corresponding Fr. phr. with *de* (see note to 4.), so that 'a child of x years old' might be orig. = 'a child old (in respect) of x years'. But there is a chronological gap between the two constructions, the earliest examples of the latter being in *Cursor M.* In one instance, the oldest text has 'a tua yer ald', i.e. 'of two years' age', in which the later MSS. substitute *old* for *ald*. But in another instance, the reading 'of three yer ald' is evidently original. Whether this implies a confusion between *old*, *eld* and *ald*, as app in the Chaucer quot., which follows, or the existence of two forms derived from OE. *propra geara eald*, viz. 'three year old', and 'of three year old', is not clear; but what is evident is that 'x year(s) old' soon came to be taken in the lump as a sb. phr. which might be preceded by any prep., since we find c1400 'from 11 year(s) old', and in the next cent. 'at nine months' old' = 'at the age of nine months'.

A similar usage is found with *hugh*, *long*, *broad*, *deep*, etc. (which also in OE. were preceded by a genitive or accus. phr. of dimension); but there the const. with *of* appears to be later, and that with other preps less usual: see Or 391).

Oleomargarine (ōlē'ōmārgārin, -in), [*f. OLEO- b + MARGARINE*. Often mispronounced (-mārgārin), as if spelt *margarine*.]

A fatty substance obtained by extracting the liquid portion from clarified beef fat by pressure, and allowing it to solidify; with the addition of butyrin, or more or less admixture of butter, milk, etc. and sometimes of refined lard, it forms a substitute for natural butter, formerly sold as *butterine*, but now legally called in Great Britain (also in France, Germany, Denmark, etc.) *margarine*.

In U.S., *oleomargarine*, popularly *oleo*, is the recognized name of the commercial product, the expressed fat being distinguished as *oleo oil*.

The name *oleo-margarine* was applied as early as 1854 by the French chemist Berthelot (*Ann. Chem. Phys.* XLI. 242 footnote) to a solid substance obtained c. 1838 by Pelouze and Boudet (*Comptes Rendus* VII. 665) from olive oil, which was regarded as a combination of the *oléine* and 'margarine' of Chevreul and Berthelot. (See MARGARINE.) According to the view then held, *oléine*, 'margarine', and *stéarine*, were regarded as the essential constituents of animal fat. As butter, or the fat of milk, consists according to Chevreul mainly of *oléine* and 'margarine' with a small amount of butyrin and allied principles, M. Mège-Mourès in 1859-71 experimented on its artificial production by the extraction of the *oléine* and 'margarine' from animal fat, with subsequent processes for the addition of butyrin, etc. Hence the name *oleo-margarine* for the supposed combination of *oléine* and 'margarine' thus extracted. As further research has shown that neither the 'margarine' of Chevreul, nor the *oleo-margarine* of Berthelot are definite chemical substances, these names are no longer in chemical use, and 'oleo-margarine' has only a manufacturing or commercial use for the fatty substance described above, or (as in U.S.) for the artificial butter (MARGARINE) made from it.

Oliver 2 (p livar) [Origin uncertain.]

A tilt-hammer having the arm or handle attached to an axle, worked with the foot by a treadle which brings the hammer down, and with a spring which raises it; used esp. in the shaping of nails, bolts, and the like.

Such a contrivance is described in 1686 by PLOT *Oxfordsh* 390 'A large sledg set in an axis of wood, from whence goes a rodd of iron fastned to a pallet that reaches out a little beyond the anvil, which being drawn by the foot of the smith is returned again by three springs of holly that clasp the axis the contrary way' This mention of 'springs of holly', together with the variant *holliper* in quot 1883, has suggested that the origin may be found in *holp*, although the established spelling (which evidently goes back to times anterior to living memory) points to the proper name *Oliver*.

1846 HOLZAPFEL *Turning & Mach. Manuf* 96a The Oliver, or small lift hammer was used when the author first saw it, in making long stout nails, intended for fixing the tires of wheels. 1869 *Eng. Mech* 31 Dec. 387/1 1881 GREENFR *Gun* 257 The iron pins are stamped upon olivers, in much the same manner as described for stamping with dies. 1882 *Standard* 26 Dec. 2/3 The 'Oliver' on the top of which is fixed the stamp of the particular pattern and size of the nail required to be made. 1883 CRANE *Smithy & P* (1885) 30 The 'Oliver' or 'Holliper' consists of a top and bottom swage united by a spring. 1896 *Cyclist* 8 Jan. 26/a The brazers' and smiths' hearths. By them are the steam olivers and stamping presses.

On (m. *unstr.* ōn), *prep.* Also 1-5 an, 2-5 o, a (see *AN prep.*, *A prep.* 1, *O prep.* 1); (3 ōn, Ōrm onn, 4-5 oon, 5 oone, 5-6 one, un, 6 onn) [*OE. an, on* = *OFris. an, OS. and ODu. ana, an* (MDu. *ane, an, aen, Du. aan* (dial. *an*), *MLG. an, LG. ān, an*), *OHG. ana, an* (MHG. *ane, an, Ger. an*), *ON. ā* (Norw. *ODA. aa, OSw. ā*), *Goth. ana* - *Otent* **ana* prep. adv. = *Gk. ἀνά* on, upon, up, *Zend.* *ana* upon, *Oscan* and *Umbrian an*. The original WGer *an* was sometimes retained in *OE.* (see *AN prep.*), but the regular stressless form was *on*. Before 1200, unstressed *on* before a cons. was worn down to *o* and *a*, e.g. *o bisse wise* on this wise, *o live*, *a live* in life, and in this form often coalesced with the following word as *olive*, *alvise*; when the following word began with a vowel, the enclitic form was *an*, as *an-edge*, *an-ende*, *an-hand*, *an-high*. See *A prep.* 1, *AN prep.*, *O prep.* 1. This form *a* (rarely *an*) survives only when its connexion with *on* is no longer felt, and usually in combination, as *ashore*, or in special con-

structions as *set a going*. The regular *prep.* and adv. is *on*. But in 16-18th c. the *prep.* was often colloquially, and in the dramatists, reduced to *o*, as in *o my life* (Shaks), *o my conscience* (Sheridan), a form now prevalent in north Eng. dialects, see *Eng. Dial. Dict.*

General Sense.—The preposition expressing primarily the relation of contact with or proximity to the surface of anything, and so that of being supported or upheld by it, also, from the earliest times expressing motion to or towards such a position; these two senses being (as in the preposition *IN*) distinguished by the case of the word affected, the former taking, in *OE.*, the *dative* (rarely the *instrumental*) for earlier locative, the latter the *accusative* or case of motion towards. But the *OE.* point of view often differed from the modern, so that the *accusative* was not seldom used where we should expect the *dative*, and *vice versa*. (See *Wulfing Syntax Alfreds der Grossen* II. § 784, 801, 821). In *ME.*, the distinction of case disappeared, but *on* continued in both uses, the sense being generally indicated by the accompanying verb (e.g. to *lie* on, to *lay* on), though not infrequently with ambiguity, to remedy which the sense of motion began in the 16th c. to be indicated in case of need by the collocation *on io*, now sometimes written *onio*, after the analogy of *into*.

From the earliest times in the Teutonic langs. this *prep.* has been used in reference not merely to the upper surface or top of a thing, but to the front or any surface (this being the mod. Ger. and Du. use of *an*, *aan*, e.g. *an der thür* at the door, *an die thür* to the door); this was also the use in *OE.* But here *on* received a notable extension of sense, by being used to include also the notion of 'in', almost to the elimination of the *prep. in* from W. Sax. and the dialects influenced by it. (Cf. *IN prep.*) So in Early southern *ME.*, *on* still included the sphere of both 'on' and 'in' (sense 5); but *in* was gradually restored; not, however, without the survival of many traces of the former prevalence of *on*; thence also a difficulty, in some of the transferred senses, in determining whether the starting-point was 'on' or 'in'. Eventually, not only was this extension in the direction of 'in' given up, but the language has shown a growing tendency to restrict *on* to the upper or at least the supporting surface, = *F. sur*, so as to correspond in use rather to *auf* than *an* in German; this comes out strongly also in the transf. and fig. senses in which *on* indicates the basis or foundation of action, feeling, etc. In *OE.*, when the upper surface was specially in view, *ofer* was sometimes used; but the notion was usually expressed by the combination *uppan*, *uppon* (= *up* + *on*: cf. *ON. upp* d) When, in course of time, *on* itself came to be more associated with the upper surface, the distinction between *on* and *uppon* gradually faded away, and *uppon* may now be used instead of *on*, in positions into which no notion of *up* enters (see *UPON*). These changes in the sense-territory covered at different times by *on* make the historical and logical order of the senses difficult; and the following arrangement is in many respects provisional. Even the primary division into senses implying position and those implying motion or direction is difficult to carry out in the figurative uses, in some of which the point of view has gradually changed since they first arose, so that what was originally felt to express a direction of the mind towards something is now felt as a static attitude or mental state.

* Of local position outside of, but close to or near, any surface. Primarily of things physical, but also of non-physical things treated as having extension.

h. Hence arise many phrases, originally expressing physical situation, of which the sense becomes more or less figurative, as an expression of what is done or implied in such a position. Such are the following, for which see the respective sbs.:

Phrases originally literal, when thus used, sometimes serve as models for others which never were literal, e.g. *on a level, on an equality, on a par*.

On-, *prefix* 1, the prepositional adv. *on* (unstressed form of OE, *an*, *on*) in combination with vbs. and their derivatives, and sometimes with other sbs. The old nominal compounds had the stressed form, as in OE, *angum*, *gigum*, beginning, *anfild*, *anfild*, *ANFILL*. The compounds in *on-* belong to the following classes:

1. Old verbal compounds, as *onbidan* to ONBIDE, *onclāw-an* to recognize, ACKNOW. Such of these as survived the OE. period appear in their alphabetical place under ON- or A-

2. Later verbal compounds or collocations of adv. and verb. In these the union of elements is incomplete, and the adv. may be moved to another position than immediately before the vb, where however it regularly stands in the inf. and pples., so that these acquire more the character of permanent combinations. Examples are † *on-become*, to befall, happen; † *on-cry*, to cry or call upon; *on-draw*, to draw on; † *on-lace*, to lace on; † *on-look*, to look on, *on-sweep*, to sweep on; † *on-take*, to take on, assume, behave. see TAKE v

The word remained dissyllabic in some dialects till 15th c., but in others was reduced to a monosyllable early in 14th. The final s retained its breath sound, and so began c. 1500 to be spelt -ce, as in *hence*, *perce*, *fence*, *ice*, *mace*, *twice*. From this a dial form *onst* (wɒnst) has arisen in north. midl., Ireland, etc., as in *against*, *amidst*, *amongst*, etc. The development of the initial long vowel in Standard English as *wo-*, *wu-*, in north. dial. and Sc. as *ya-*, *ye-*, is the same as in ONB.]

[*Com. Tent.* OE *an* = OFris. *ân*, *en*, OS *en* (MDu., Du. *een*), OHG (MHG, Ger) *ein*, ON *einn* - *ain* r (Da. *en*, Sw *en*), Goth *ain-s* - OTeut. **ain-s* - *pre*-Teut. **ainos* = L. *ainus* (OL *ainos*); OIr. *ben*, OSlav. *inъ*, Lith. *vienas* one; cf. Gr. *olvos*, *olvi*, ace. OE *an* became in regular course in south. and midl. dial. *ân*, exemplified before 1200. By 15th c, *ân*, *oon*, in s.w. and west, had developed (through *ân*, *uon*, *uort*, *uun*)

an initial *w* (cf. the s.w. *wuik*, *wuuts* = oak, oaks), which only occasionally appears in the spelling (see A below), but is now the standard pronunciation. The first orthoepist to refer to it was app. Jones 1701: earlier grammarians, down to Cooper 1685, give to *one* the sound that it has in *alone*, *atone*, and *only*; Dyche in 1710 has (pn) beside (wɒn). In the north, *ân* was retained in ME., but through the narrowing of ong. long *â* to (*ē*, *ē*, *ē*, *ē*, *ē*) *ân* has sunk in dialectal utterance through *âne*, to *eane*, *ean*, *yan*, *yen*, the development of (yen) in the north being the counterpart of that of (wɒn) in the south. In OE., *ân* had the full adj. inflexions, definite and indefinite, remains of which persisted in the south to c 1300, and in Kent still later (see A §); but, in north and midl. Eng., the uninflected *ân*, *ôn*, with the definite form *âne*, *one* (OE *ana*, *ane*), is found in the accus. and dative, as well as the nom. by 1200. Already about, *ân*, *ôn* were reduced before a cons. to *â*, *ô* (oo), which did not die out till the 16th c.

In the north the separation of *ân* and *â* was more permanent; at the present day in *Sc.* the full form *ane*, *âne*, etc., is only used absolutely or in the predicate, *ae*, *ean*, *is hæe ane*, so in north Eng. dial. with *ân* and *yan*. From the early *an*, *a*, pronounced proclitically without stress,

arose the 'indefinite article' *AN*, *A*, q.v. In northern dial. the numeral and article were long written alike, the stress or emphasis alone distinguishing them; in 16th c. *Sc.* both were written *ane* (See *A* *adv.*, *ANE*). By more or less permanent coalescence of a preceding *the*, the collocations *the ane*, *theit a*, *theit a*, became *the tane*, *the tone*, *the ta*, *the to* (See *TONE*)]

meaning) the speaker himself; 'you, or I, or any one'; a person, a man; we, you, people, they (= OE. *man*, ME. *man*, G. *man*, F. *on*). Poss. *one's*, obj. *one*, reflexively *ONESELF* (formerly *one's self*); but for these the third person pronouns *his*, *him*, *himself* were formerly usual, and are still sometimes used; thus, 'If one showed oneself (himself) to one's (his) townsmen, they would know one' (The pl. prons. *their*, *them*, *themselves*, were formerly in general use on account of their indefiniteness of gender, but this is now considered ungrammatical). In this sense *one* is quite toneless (*wān*), proclitic or enclitic.

22 An absolute form of *a*, to avoid repetition of a sb : A person or thing of the kind already mentioned; as 'I lose a neighbour and you gain one', 'He rents a house, but I own one'.

Formerly, *one* at the end of a clause or sentence was pleonastic or emphatic.

23. Added after demonstrative and pronominal adjs., as *the, this, that, you; any, each, every, many (a), other, such (a), what (a), what kind of (a), which*, and (in certain phrases) after *a*; also after ordinary adjs. preceded by any of these or (in plural) alone; in the sense of A thing or person, pl. things or persons, of the kind in question.

The addition of *one* or *ones* often serves as a definition of number cf. 'Which do you choose?' with 'Which one do you choose?' 'Which ones do you choose?'; 'the good one, the good ones' = *F. le bon, les bons*. After *a* or *the*, one has weak stress; after the other words, it is enclitic (ðis'wun, ðæt'wun, ægud'wun, ðæt'wun). As this use began before *one* took the initial *w*, the latter is in dialect or colloquial speech often omitted, a good 'un, ðæt'wun, etc.
